

Think you know who's in your back yard?

You might not be expecting this visitor. Most people have heard about the **Emerald Ash Borer**, but few of us understand the risk it represents to the City's tree canopy. The EAB has already devastated parts of the urban landscape. Your neighbourhood could be next!

The **Federation of Citizens' Associations (FCA)** invites you to a free public information forum and panel discussion, where you can learn from experts:

- how serious the threat is in Ottawa and what the City's strategies are to deal with this infestation
- about TreeAzin biopesticide and approved servicing companies
- lessons learned this summer
- what individuals and community associations can do

Join us **Tuesday, October 9, 2012** from 6 pm
at **Overbrook Community Centre**, 33 Quill Street

Program:

6 -- 7 pm Refreshments, speak to experts
7 – 8 pm Moderated panel discussion
8 – 9 pm Public Q&A from the floor

Experts:

David Barkley, **City of Ottawa** Forester
George Lamirande, **Davey Tree**, Ottawa Area Manager
Dave Buttivant, **Eastern Ontario Arborists**, President
Joe Meating, **BioForest**, President
Bruce Gill, **Canadian Food Inspection Agency**, Research Scientist
