

Objectives for READ

We aim to support the OLB in ensuring the Rosemount Library catchment area has a fully up to date and expanded library facility located centrally and accessible to all community residents. We are mobilizing broad community support representing 12 Community Associations to ensure that we can work appropriately with OLB and our residents.

- We believe the current Rosemount location is ideal but the facilities are not adequate since they have not been significantly updated for over 30 years while the area has grown very substantially
- The current building is much beloved of the community but our primary aim is to have an expanded and fully functional facility.
- We will work tirelessly with OLB and with other members of our community until this objective is attained.
